

DepthTrax™ 1H

DEPTH FINDER

SPECIFICATIONS:

- Batteries: 9 VOLT ALKALINE
- Display Type: Liquid Crystal
- Waterproofing: IPX 8 (150 Feet)
- Op. Temp. Range: -10 -160°F
- Depth Range: 2' to 240'
- Transducer: Integrated
- Frequency: 200 kHz
- Beam Angle: 20 Degrees

DepthTrax™ 1h Handheld Depth Finder— The trouble with most depth sounders is that they can only see what's in a fairly narrow cone directly under your boat. However, the ultralight handheld DepthTrax™ 1H lets you aim its beam wherever you want to see, like an underwater flashlight. One slide of the magnetic switch gives real time depth readings, while another slide will indicate the current water or air temperature.

Algorithmic programming virtually eliminates false readings while Shoot Thru Technology allows readings through ice and solid fiberglass or aluminum boat, kayak, or canoe hulls. The impact resistant housing includes a wrist strap and the unit floats if dropped overboard. Since its submersible to 150' you can use it as a range finder while snorkeling and diving.

FEATURES:

- DepthTrax™ Intelligent Sonar
- Delivers Precise Depth Readings Up To 240 Ft
- Air and Water Temperature Readings
- Backlit Liquid Crystal Display
- Automatic Gain & Sensitivity Adjustment
- Shoot-Thru Technology™ Allows Readings Through Ice and Boat Hulls
- Magnetic On/Off Switch (no external metal parts)
- Impact Resistant & Floatable Housing
- Diver Designed Waterproof Rating to 150 Foot Depths
- 2 Year Warranty With 24 Hour Online Technical Support
