SeaLife®

## micro HD™

## Permanently sealed and never leaks, with nothing to maintain

Introducing the world's first permanently sealed camera that never leaks. There are no O-rings to maintain or openings and doors that could possibly leak. Charging the battery or downloading pictures and video is as easy as plugging the USB cable into the camera's waterproof USB port. The internal high capacity li-ion battery lasts over three hours of continuous operation with one charge.

Charging and image/video transfer through waterproof USB port. There's no need for memory cards, batteries, or O-rings.

## Two models

The SeaLife **Micro HD** includes 16GB internal memory for hours of continuous recording and thousands of pictures. The **Micro HD+** features 32GB internal memory and WiFi for connecting to iOS or Android devices.

### micro HD™

**16 GB**

### micro HD+™

**32 GB + WiFi**

## Easy sharing and downloading

The Micro HD+ can wirelessly download and share images and video to iOS and Android devices through the free app "Action Cam HD." The app offers uploading to YouTube, DropBox and other online services, perfect for backing up and sharing your photos and videos immediately after a dive or during your vacation. The app also allows for wireless control of the Micro HD camera, providing a real time view of the LCD and the ability to capture and review photos and videos all on your smartphone or tablet.

## Easy

Ease of use is one of the outstanding features of the Micro HD. Despite its small size, the rubber armored camera is easy to handle and control down to 200 feet underwater using only three wide “Piano Keys” even while wearing gloves. The Easy Setup Guide is a fast and intuitive new way to select land, dive, snorkel, or external light modes for pictures, allowing users to spend more time immersed in their environment rather than scrolling through a menu list.

Large “Piano Key” Controls

140-degree Fisheye Wide Angle Lens

4.2 in/10.7 cm

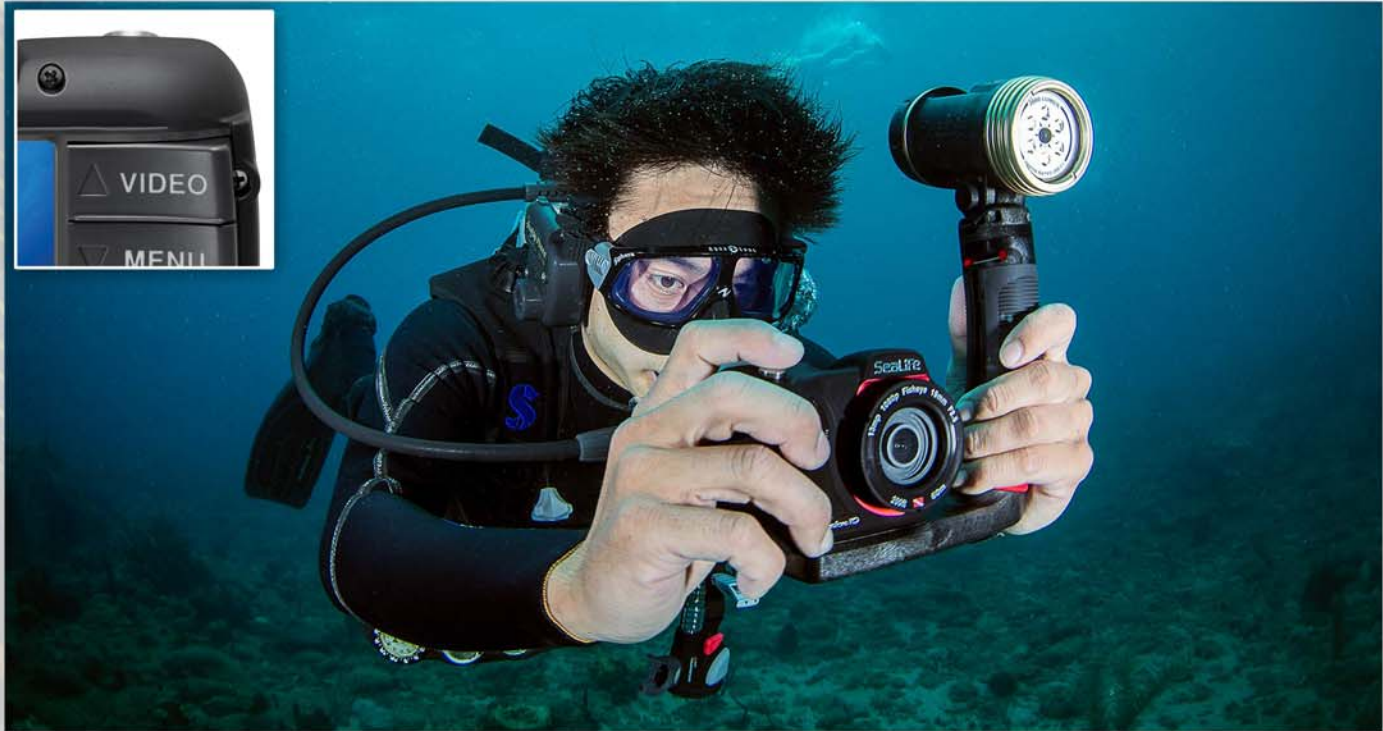

## The Micro HD Fisheye Lens

The built-in wide angle lens of 140 degrees helps stabilize videos and capture large objects and wide scenes at close shooting distances. Capturing surprise encounters with sea creatures is made possible with a fast shutter response and sharp focus from one foot to infinity.

## One-touch video

The Micro HD offers fast one-touch video recording. Bypassing the usual steps, the video key will start and stop videos immediately. While video is recording, pushing the shutter button will take a still picture without stopping the video. The Micro HD features full 1080p HD resolution video, capable of delivering stunning underwater footage of colorful sea creatures, reefs and other undersea landscapes.

## Sealife Land & Sea<sup>®</sup> Mode

The Micro HD features Land & Sea Mode color correction, including four underwater modes with automatic color adjustment. The Snorkel Mode is perfect for capturing vibrant natural colors at shallow depths, while the Dive Mode restores the red and yellow colors lost at deeper depths.

# flex-connect™

## Easy to use and even easier to expand

Since bright lighting is essential to revealing magnificent underwater colors, the Micro HD is expandable with the powerful new Sea Dragon underwater lights. "3-in-1" Sea Dragon LED lighting can be used as your photo, video and dive light.

**Micro HD Sea Dragon Pro set**  
Includes Micro HD+, Flex-Connect Micro Tray & Grip, and Sea Dragon 2000 Lumen Light

Micro HD+ with *optional* Flex-Connect Dual Tray, two grips, and two Sea Dragon 2000 Lumen Lights

## Expand the camera's capabilities with Flex-Connect arms, grips, trays and accessories

Flex-Connect accessories "click" together in seconds for easy set-up and disassemble equally as fast for compact traveling. An exciting way to get close to colorful reef scenes and creatures in caves and crevices is to mount the camera on SeaLife's extendable AquaPod, a 54" extendable camera pole designed especially for use in water.

## **Models:**

**Micro HD** (16GB)

**Item SL500**

**Micro HD+** (32GB + WiFi)

**Item SL501**

**Micro HD+ Sea Dragon Pro set**

**Item SL505**

## **Key Features:**

- Permanently sealed – No waterproof door or O-rings to maintain
- Wifi wirelessly download and share pictures/videos to your smart phone or tablet with free Action Cam HD app for preview, playback and camera settings
- Full 1080p HD video at 30fps or 720p at 60fps
- 13 megapixel still images for sharp, colorful pictures
- 140° Fisheye Lens – Get close to your subject and still fit everything into the picture
- “Piano Key” controls for easy operation, with or without gloves
- Picture in Video - Take still images while recording full HD video
- Easy Set-up mode with simple menu selections:
  - Land Auto mode for action photos and videos above water
  - Dive mode for underwater exposure control and color correction while diving
  - Snorkel mode for underwater exposure control and color correction while snorkeling or diving in shallow water
  - Ext Light mode – Color, exposure and picture size settings optimized for taking underwater photos and videos with optional Sea Dragon LED light accessory
  - Dual Ext Light mode – Color, exposure and picture size settings optimized for taking underwater photos and videos with wider beam angle of two lights
- 16GB or 32GB internal memory - 32GB holds 8000+ still images or 6+ hours video
- Waterproof to 200ft / 60m
- Weight: 8.8 ounces / 250 grams
- Dimensions: 4.2" x 1.9" x 2.9" (10.7cm x 4.8cm x 7.4cm)
- Ultra-compact design For easy handling and lightweight travel
- Fully rubber armored and shock resistant
- Fisheye instant focus lens from 12in / 30cm to infinity
- Rapid Fire and Time Lapse Shooting shoots 10 frames per sec or continuous still images at set time intervals
- 2400 mAh internal lithium rechargeable battery for 3+ hours of operation
- Large 2.4" TFT Color LCD for easy on-camera viewing
- Soft Rubber grip design for sure grip
- Expandable with popular SeaLife accessories (One or two Sea Dragon Photo-Video-Dive Lights, Close-up Lens)
