

Hugyfot housing for Nikon D7000

picture: Luc Feckhaut

When taking off to remote areas in order to shoot exceptional images, one should leave nothing to chance since there might never be a second chance. When shooting pictures under water, reliable equipment is even more important. An underwater camera housing should not only protect your expensive camera equipment from the surrounding water, it should also allow you to control your camera as easily as if it weren't there. Underwater photography in extreme situations requires a compact, yet ergonomically designed housing that allows you to shoot pictures without having to trouble your mind on how to set the camera controls. Hugyfot is renowned for its compact and ergonomically designed housings, machined from solid aluminum. These housings have proven to be the best choice, particularly when reliability, handiness and weight become of significance.

From the early start in 1953, the Hugyfot philosophy consisted in developing housings that were not only functional and of high quality, but that also distinguished themselves from other brands by their well-considered and stubborn design.

Functional

Hugyfot housings are above all functional. After all, a housing is merely a protective cover and should under no circumstances prevent a swift operation of the camera. A good housing is to be considered as a second skin around the camera, allowing the user to control the camera without any concession. Furthermore, the patented Hugyfot grip allows a single hand control while under water.

Technical Data of the Housing

Name: HFN D7000
B x H x D: 220 x 220 x 135 mm
Weight: 2.790 g (without camera)
0 g (under water with camera)
Material: Aluminum (AlMgSi1)
Color: Black
Depth: 100 m (300 ft) tested

Qualitative

Hugyfot housings have the added advantage of being very robust. They are machined out of solid aluminum and are extremely pressure resistant. They come standard with a pressure rating to 100 meters. Optionally this can be increased to 150 meter.

Design

The well-considered and stubborn design however, is the most commonly known trademark of Hugyfot. The close on sexy curves of the Hugyfot housings do not only provide compact and ergonomic housings, they also see to the charisma and the typical contours that distinguish them from all the others.
