(with optional S-6
connector for surface
video cable)

Hugyfot housing for GoPro Hero

Without a doubt, the GoPro Hero is an exceptional camera that deserves an exceptional housing. Therefore Hugyfot developed a housing that features:

- up to 6 hours of runtime instead of 40 minutes;
- use of the original GoPro LCD screen in a separate watertight housing (pole cam);
- use of an extra large (4.3") screen in a separate watertight housing;
- connection for extra external battery pack for extreme time lapse shots;
- optional extra 'video out' connection with 100m cable;
- pressure rating to 200m.

'video out' connection

The Huggyfot Base+, Pro and Pro+ housings can be equipped with a 'video out' connection (option).

This connection can be used with a 100m cable (max. length) that will transfer the underwater images 'on-the-fly' to a monitor at the surface.

S-6 connector
(housing side)

BNC-connector / RCA adapter
(monitor side)

Base+ housing

The Base+ housing comes standard with a powerful battery pack (lasts up to 6 hours) and a multifunctional S-6 socket. This socket can be used to connect the Hugyfot 4.3" LCD screen or a 100m cable that transfers the underwater images to a monitor at the surface. Machined out of solid aluminium, it is pressure rated to 200m and offers full camera control. The Base+ housing can accommodate a GoPro Hero 3/3+ or 4 camera.

Available options for the Base+ housing

wing

red/magenta filter

flip-up macro lens holder
(requires wing)

extra S-6 connector

coax cable

4.3" monitor

Pro+ housing

The Pro+ housing comes standard with a powerful battery pack (lasts up to 6 hours) and a separate 4.3" LCD screen in a waterproof housing. The Pro+ housing comes standard with the flip-up red filter and screen protection and the Hugyfot 'double decker wings' with handles and mount balls. Machined out of solid aluminium, it is pressure rated to 200m and offers full camera control. The Pro+ housing can accommodate a GoPro Hero 3/3+ or 4 camera.

* Picture shows **optional** S-6 connector.

Available options for the Pro+ housing

flip-up macro lens holder

S-6 connector

coax cable
(requires S-6 connector)

Double decker wings

The Hugyfot 'double decker wings' are extremely versatile and allow a stable use of your GoPro housing. **Required when using the M67/M77 filter holders.**

Product reference: 7.880 - **Retail: €100 incl. VAT**

Flip-up red filter

The flip-up red filter considerably improves the image color quality from a depth of 5 to 15m while the integrated screen cover protects the front window from scratches. Magenta replacement filter (fresh water) available.

Product reference: 8.200 - **Retail: €60 incl. VAT**
Magenta filter: 8.350 - **Retail: €25 incl. VAT**

M67/M77 Lens holder

The flip-up macro lens holders (available in M67 and M77) can hold a broad range of underwater macro lenses. Set the angle of view on your camera to 'narrow' and shoot images of small critters. **Requires 'double decker wings'.**

Product reference M77: 8.343 - **Retail: €50 incl. VAT**
Product reference M67: 8.344 - **Retail: €50 incl. VAT**

S-6 connector

The S-6 connector allows a 'plug-and-play' connection with the 4.3" LCD monitor or with the surface monitor cable.

Product reference: 6.419 - **Retail: €160 incl. VAT**

4.3" LCD monitor

With a surface 3x the size of the GoPro LCD Touch BacPac, the Hugyfot 4.3" LCD monitor will get you a crisp and detailed view. Color, brightness and contrast correction as well as replay button are integrated. **Requires 'S-6 connector'.**

Product reference: 8.414 - **Retail: €745 incl. VAT**

Surface monitor cable

With a length of up to 100m, the surface monitor cable will transfer the GoPro video signal up to the shore, boat or any land based monitor. Great for sharing your images on-the-fly. **Requires 'S-6 connector'.**

Surface monitor cable: price on request.
Can be ordered to specific length (max. 100m).
