

Hugyfot housing for

Hero 3+

Depth rating: 200m

Battery life: 6h

Warranty: 2 years

Since 1953

Hugyfot housing for Hero 3+

Base model
(can be upgraded
to Pro model)

Pro model
(with optional flip-up
macro lens holder)

Without a doubt, the GoPro Hero 3+ is an exceptional camera that deserves an exceptional housing. Therefore Hugyfot developed a housing that features:

- up to 6 hours of runtime instead of 40 minutes;
- use of the original GoPro LCD screen in a separate watertight housing (pole cam);
- underwater microphone connection;
- connection for extra external battery pack for extreme time lapse shots;
- optional extra 'video out' connection with 100m cable;
- pressure rating to 200m.

Base model

Pro model

depth rating: 200m
 battery life: 6h
 separate monitor housing
 red filter/screen protection
 twin wing/handles
 2 years warranty

'video out' connection

The Hugyfot Pro housing can be equipped with an extra 'video out' connection (option). This connection can be used with a 100m cable (max. length) which will transfer the underwater images to a monitor at the surface.

S-6 connector (housing side)

BNC-connector / RCA adapter (monitor side)
