

## Ikelite Compact **Digital** Housings for

Canon • Fuji • Nikon • Olympus • Sony

Ikelite provides a full line of optional accessories for our digital housings. Choose from a selection of filters, wide-angle lenses, arm systems and strobes to build a system tailored specifically to your photographic needs. All housings are factory serviceable and include a one-year warranty backed by our reputation for the best service in the scuba industry. Housings depth rated to 60m (200')

## Ikelite **DS161** Movie Substrobe

For over 30 years Ikelite has been the leader of innovation of underwater strobe lighting. We are proud to introduce the first strobe that meets the challenge presented by today's sophisticated "hybrid" cameras. Cameras combining high-quality digital still imaging with hi-definition video recording demand an underwater strobe that's up to the challenge. The DS161 combines all of the functionality of our renowned DS160 with a 500 lumen LED video light with 45° spread, daylight balanced and 5 hour continuous burn time.

## Ikelite **DSLR** Housings for

Canon • Nikon • Olympus • Sony

Ikelite's SLR-DC housings are molded of clear, lightweight polycarbonate which offers a clear view of the info window and LCD screen. Our simple and reliable port system now features four port locks. All housings incorporate TTL Conversion Circuitry and an Exposure Compensation Module. Housings provide controls for most camera functions and a Super-Eye for enhanced viewing with a dive mask. The rubber hand grips incorporate quick-release mounts for external Ikelite DS Substrobes. Depth rated to 60m (200').

## Ikelite **Video** Housings for

Canon • JVC • Sony

Molded of clear, lightweight polycarbonate which offers a clear view of camera information and control functions. The camcorder's LCD monitor can be clearly viewed either through the back of the housing or using a mirror attached to the side (varies by camera model). All housings include a removable UR/Pro filter for color correction in tropical blue water. Wide angle lenses and other color filters are available for all models.
