■ Lens System Compatibility with 『Cyber-shot DSC-RX100』/『Ikelite #6116.10』 (*1) ■

The Ikelite #6116.10 has 67mm screw mount and below listed INON attachment lenses are usable. For wide imaging, INON 「UWL-H100 28M67 Type1」 is compatible and its super dome option 「Dome Lens Unit II for UWL-H100」(*3)(*4) further increases to shoot 『semi-fisheye imaging』.

・「UWL-H100 28M67 Type1」Wide Conversion Lens

- Available in the market
- JAN code : 456212143 632 9

・「Dome Lens Unit II for UWL-H100」(*3)(*4)

- Available in the market
- JAN code : 456212143 620 6

For macro shooting, below INON close-up lenses are compatible.

・「UCL-165M67」Close-up Lens (*5)

- Available in the market
- JAN code : 456212143 162 1

・「UCL-330」Close-up Lens (*5)

- Available in the market
- JAN code : 456212143 156 0

Also INON “underwater micro fisheye lens” 「UFL-M150 ZM80」(*6) is compatible to capture underwater world through a view of a tiny fish to create unique image only by this lens.

・「UFL-M150 ZM80」Underwater Micro Fisheye Lens

- Available in the market
- JAN code : 456212143 621 3

・「M27-M67 Mount Converter for UFL-M150 ZM80」

- Available in the market
- JAN code : 456212143 623 7
- (Necessary to attach the UFL-M150 ZM80 on the housing)

Above listed INON attachment lenses are wet lens and interchangeable underwater to support any shooting situation including 『semi-fisheye』, 『ultra macro』 and 『underwater bug eye』 imaging.

(*3)

Slight vignetting will be observed at zoom wide end. Crop an image after shooting or zoom in little bit.

(*4)

When shooting at zoom wide end, image corner could have slight degradation depending on shooting condition. In such a case, use smaller aperture (large f number) setting.

(*5)

When using a close-up lens, vignetting will be observed at zoom wide end. Zoom in little bit.

(*6)

Image corner could have slight degradation depending on shooting condition. In such a case, use smaller aperture (large f number) setting.

■ Arm System Compatibility with 『Cyber-shot RX100』/『Ikelite #6116.10』 (*1) ■

The 「Grip Base M1 (12-24 Tripod Screw Set)」specially designed for a housing with 12-24UNC screw holes, is compatible.

Combined housing is securely attached on the Grip Base M1 with two tripod screws and wide range of INON adapters/base products are compatible on its strobe/arm mount. It is easy to add extra 「D Holder」 for dual strobe configuration. Its base part has legs for stable placement of combined housing. Optional 「1/4 Tripod Screw (for Grip Base D4)」and 「M6 Washer」 enable to use the Grip Base M1 for INON X-2 for GF2 housing or Olympus PT-EP10 housing etc. (*7)

For existing Grip Base M1 customers, optional 「12-24 Tripod Screw Set (for Grip Base M1)」which consists of two sets of 12-24 Tripod Screw and M5 Washer, is available (*8)
