

# Reflective Sticker

INON INC. is pleased to announce two types of *Reflective Sticker* released on January 29, 2020. One for *Strobe Light Shade* (comes with Z-330/D-200) and the other for *Light Shade LF-EW* (comes with LED lights including LF2400h-EW) to enable creative lighting using bounced strobe/LED light.

*Reflective Sticker D/Z*

--Retail in Japan: JPY200-  
--JAN code: 456212143 962 7

*Reflective Sticker LF-EW*

--Retail in Japan: JPY200-  
--JAN code: 456212143 963 4

## Features

The *Reflective Sticker D/Z* is to be attached on the inner surface of the *Strobe Light Shade* to bounce strobe light to provide even lighting.

The *Reflective Sticker LF-EW* is to be attached on the inner surface of the *Light Shade LF-EW* to bounce LED light to provide even lighting.

When shooting macro subject, the *Reflective Sticker* can add soft bounced indirect light (PAT.P).

Above images show how the *Reflective Sticker* changes light distribution.

Another benefit using the *Reflective Sticker* is to deliver even light in confined area as like lit a subject from sides to prevent dark spot.

The *Reflective Sticker* is bundled in compatible products. One *Reflective Sticker D/Z* for *Z-330/D-200* strobe and one *Reflective Sticker LF-EW* for *LF2400h-EW*, *LF3100-EW*, *LF1100h-EWf* and *LF1300-EWf* from January 29th, 2020 shipment.

January 24th, 2020  
INON INC.

\*Press release information is as of January 24th, 2020 and subject to change without prior notice.
