--Retail in Japan: JPY12,800-

--JAN code : 456212143 742 5

「LE350」

(*1)

LE250

(*2)

The LE250 will be discontinued and available from limited stock at INON dealers upon release of the LE350.

■ LE350 Features ■

● Powerful 350 lumen beam with long burn time on 3 x AA batteries

The LE350 runs on 3 x AA batteries which are easily obtainable yet provides approx. 40% brighter than predecessor model (LE250) with on board Cree high-power LED “XM-L”. The rated practical burn time with “enloop pro” (HR-3UWX) rechargeable batteries, is approx. 165 minutes underwater(*3).

(*3)

Average measured time to get half brightness when continuously turn ON the product underwater (approx. 25°C/77°F).

● Selectable beam coverage 30°/60° carrying high versatility for land use as well

Standard accessory of the LE350 includes “W50°Filter LE” to effectively widen standard 30° beam coverage to 60° with its fly-eye lens structure and “Red Filter LE” not to stimulate shy subjects by attaching the filter on its front. Optional “Color Filter LE Set” is available to change color tone without changing beam coverage.

The LE350 supports you in various situations as a durable dive light or assisting lighting device for underwater macro imaging as well as for land use (*4) including as a bike light (*5).

(*4)

“Color Filter LE Set”/“Red Filter LE” is for underwater use only. Not usable on land.

(*5)

Optional 「Single Light Holder LE」 and 「Bar Mount」 is required to use as a bike light. Refer to compatible options section and relative information on INON web section below.

● Wide variety of optional accessories for photography/videography

As same as other “LE series” LED flashlight products, rich optional accessories support the LE350 including “Light Holder” to combine the LE350 with an arm to use for camera system.

● Durable with flood-free structure

The LE350 has a simple rotary switch with stopper function to ensure you with reliable ON/OFF operation and greatly reduces flooding risk as batteries are loaded from other end of the light body. No worries to turn the switch too much underwater.

The light head and battery box are made from aluminum alloy carrying corrosion resistance in seawater for ultra durability.

● Interchangeable Light Head

Other 3AA battery operated LE series products (*6) Light Head can be used instead of original Light Head (*7). If you already own 3AA operated LE series flashlight, 「LE350 Light Head」 is available to purchase to change original Light Head of your LE series flashlight to use as 「LE350」.

(*6)

「LE700-W」/「LE700-S」/「LE550-W」/「LE550-S」/「LE250」 as of October 2012.

(*7)

The 「LE240」 runs on 2 x AA thus not usable its Light Head in combination with battery box of 「LE700-W」/「LE700-S」/「LE550-W」/「LE550-S」/「LE350」/「LE250」.
