

# Tired with heavy underwater shooting equipments?

# Float Arm System

## Controlling underwater weight

### Float Arm S

Buoyancy : -75g/-2.6oz Effective length : 150mm/5.9in  
Outer diameter : 52mm/2.0in Weight(air) : 142g/5.0oz

### Float Arm M

Buoyancy : -135g/-4.8oz Effective length : 200mm/7.9in  
Outer diameter : 52mm/2.0in Weight(air) : 181g/6.4oz

### Float Arm ML

Buoyancy : -210g/-7.4oz Effective length : 260mm/10.2in  
Outer diameter : 52mm/2.0in Weight(air) : 235g/8.3oz

### Mega Float Arm S

Buoyancy : -390g/-13.8oz Effective length : 150mm/5.9in  
Outer diameter : 97mm/3.8in Weight(air) : 219g/7.7oz

### Mega Float Arm M

Buoyancy : -650g/-22.9oz Effective length : 200mm/7.9in  
Outer diameter : 97mm/3.8in Weight(air) : 295g/10.4oz

- ABS resin/corrosion-resistant aluminum alloy/rubber etc.
- Depth rating : 70m/230feet

#### ■ Great buoyancy

The Float Arm uses weather-resistant ABS material for its component arm body to lighten total weight creating extraordinary buoyancy comparing to existing solid arm type float system with its hollow arm body design. The hollow arm body enables not only helping weight trimming but also provide extra buoyancy.

#### ■ Wide variety of Float Arm

Float Arm system offers total 5 different type products; 「Float Arm」 series having standard  $\phi 52\text{mm}/2.0\text{in.}$  arm body with three different length, and 「Mega Float」 series having  $\phi 97\text{mm}/3.8\text{in.}$  arm body with two different length. New INON Float Arm system including existing Arm Float S provides perfect solution to benefit desired underwater weight of your camera system depending on personal preference, shooting style or condition.

#### ■ Rigid and stable gripping

The Float Arm is fully compatible with existing INON ArmII system with its high-precision machined aluminum alloy ball joint providing stable clamping with its O-ring on the ball joint and stress-free handling. Your INON Arm II system is fully compatible with new Float Arm and you can add INON lens holder on the Float Arm.

#### ■ INON commits to control underwater weight

We, INON will announce underwater weight not only housing/strobe but other accessories as much as we can to support people to consider selecting INON products knowing total underwater weight before purchasing them. The table on back page shows underwater weight of INON products as of November 2008.

### Useful for lens exchange/carry

INON Float Arm can have maximum two lens holders to assist you to bring attachment lenses underwater and support quick and stress-free lens exchange.

#### M67 Lens Holder for Float Arm

An optional part to attach INON M67 mount series attachment lens on the Float Arm.

#### AD Lens Holder

An optional part to attach INON AD/28AD mount series attachment lens on the Float Arm.

Underwater weight (estimate value in fresh water, calculated based on freshwater density = 1)

Product	U/W weight	Product	U/W weight
Arm S Float	-70 g/-2.5 oz	Arm L Set SB	197 g/6.9 oz
