

Press Release

SUBAL GH4 Housing

January.2015

SUBAL Gmbh announces the release of the professional underwater housing SUBAL GH4 for the Panasonic Lumix DMC GH4 digital system camera.

Subal, the world renowned professional underwater housing manufacturer based in Steyr, Austria, is proud to present the **SUBAL GH4 housing**. SUBAL has now entered the 4/3 mount camera segment using their experience gathered in the SLR and video housing manufacturing. With its revolutionary design, ergonomic handling and renowned quality, SUBAL will set new standard in the underwater imaging industry.

Over 40 years tradition in housing manufacturing, high quality craftsmanship, ergonomical and comfortable controls are embedded in this new housing. The handling and feel of a SUBAL is unmistakable and the unmatched reliability is unbeatable.

Subal GH4 newest housing designed for first DSLM camera in the market to record 4K. The Panasonic LUMIX DMC GH4 model equipped with a new Live MOS Sensor teaming up with Venus Engine to reduce noise while raising resolution and improving color reproduction. Innovative DFD technology to increase speed of Contrast AF.

Design and perfect handling are required by every photographer. Nothing is left to chance shooting in rough conditions. Professional photographers demand robust, highly reliable equipment, allowing access to all camera functions. We understand that just hundredths of a second can make the difference when capturing the decisive moment.

The housing will be available in February 2015 with a MSRP of **USD \$ 2,590.00**
(Port not included)

European Craftsmanship

SUBAL incorporates decades of experience and technology, pushing the boundaries further in the underwater housing industry. Innovation and design have crystallized in SUBAL's creating the most ergonomic housing for the GH4 camera in the market.

Features and Control with handling in mind

The ease of operation and superior construction features and reliability of SUBAL underwater housing, form part of our tradition and engineering DNA. We provide innovative solutions that achieve maximum user-friendliness and comfort. All functions of the camera can be operated. Video function, menu, white balance, ISO, exposure compensation, OK, multi function keys, info, AFL, AEL among others.

Designed with handling in mind. Subal engineering team play a key role, taken in consideration the ergonomics and perfect arrangement of the Panasonic GH4 controls and functions, to allow the photographer easy operation and access to all photo and video functions while holding the camera.

Technical Specifications

The SUBAL GH4 housing is produced from a solid block of high grade-seawater-resistant aluminum. The housing is anodized, and put through a chemical hardening process. Subal is the only underwater housing manufacturer to use this patented, hard-coat anodizing. A 3 layer powder-coating is added, giving the SUBAL housing an elegant finish and further protecting it from the environment. All shafts, screws are made of high-alloy chrome-nickel steel, to extend operational lifetime. The advanced manufacturing process and high-grade materials ensure that your investment will last a lifetime. The housing, like every other Subal housing, is equipped with the **SUBAL Quick Lock** closure system for maximum safety.

Controls

- Designed for professional underwater use
- Access to all camera and video functions
- Equipped with led indicator and acoustic sound leak alarm
- Standard Viewfinder
- Two fiber optic connectors
- One pc pin connector with optional N5, Ikelite and S6 connector

SUBAL GH4

Viewfinder

SUBAL supplies a standard viewfinder to support the GH4 housing.
