

## New SUBAL EM1 for Olympus OMD EM 1

EM1 housing, the newest flagship camera housing from Subal for the Olympus EM1 mirrorless camera, represents the concentration of Subal advanced housing design and long development experience. The ease of operation, superior construction features and reliability of SUBAL underwater housing are part of our tradition and engineering legacy. New design with innovative solutions achieve maximum handling and user friendliness, allowing the photographer access to all camera functions. High quality components and a faultless manufacturing process result in the most reliable housing for the professional underwater photographer.

Release May 2014. Contact your local dealer for more details.

# SUBAL MONTHLY

---

As part of our Subal monthly letter section, we will be presenting our pro team photographers to our friends and dealers. Subal photographers are an important part and link to our underwater community. They test equipment, write articles and give us important feedback regarding improvements .

Mr. Harald Karl handed over the Housing to our new Pro Team Photographer member Arturo Telle Thiemann from Canarias , Spain.

Wellcome Arturo, we are proud to have you in our Pro Team !

Arturo Telle  
Canarias, Spain

On this month edition, we have the pleasure to present to the Subal Family Arturo Telle Thiemann, professional underwater photographer and Subal Pro Team member.

He has become Subal Pro Team newest member since December 2013. A endless wining prices in past years, make Arturo one of the most awarded and recognized European underwater photographers for past 10 years. He has won second place on CMAS World Championship 2011, first place in Macro World Championship 2009 and 2011. Others International championships won are Eilat Red Sea World Underwater Images in 2007 and 2009, Open Photo Sub Isla Hierro 2006, 2007, 2012 and 2013. Open Photo Sub Isla Lanzarote 2007and 2008. Beside that, numerous regional and national Spanish championships, count to his endless winning prizes in his career as UW photographer. Arturo is also very active writing for Spanish and German underwater well known magazines. His knowledge and experience as marine biologist and professional photographer has contributed also to discover new species and in scientific magazines, books .
