

SeaLife®

AquaPod *underwater monopod* (Item SL913)

AquaPod™

The AquaPod allows for close up photos and video on reefs and wrecks while maintaining a comfortable distance between the sea creature and you. It's also ideal for exciting shark images and video, as well as other more dangerous ocean species. Easy to use and hold steady both above and below the water, the AquaPod also has a variety of security, utility and above water applications.

- Fits all SeaLife and other underwater camera brands with standard 1/4-20 tripod mount
- Includes GoPro® adapter and quick release mounting plate
- Built-in self image mirror
- Anodized aluminum and stainless steel hardware
- Includes lanyard with clip and rubber grip for secure hold
- Compact and lightweight for easy travel
- Extends from 18 inches (46cm) to to 53 inches (135cm)
