

## High CRI LED flashlight LE600h-S, LE600h-W

INON INC. is pleased to announce new addition of "h" series LED flashlight released on January 21st, 2021. The "h" series produces 6500K with higher CRI to reproduce natural color without particular hue for underwater photography, videography. These new LED lights are available for immediate shipment.

### • LE600h-S

- Release date : January 21st, 2021
- Retail in Japan : JPY17,800
- JAN code : 456212143 991 7

### • LE600h-W

- Release date : January 21st, 2021
- Retail in Japan : JPY17,800
- JAN code : 456212143 992 4

*LE600h-S*: Standard 30 degree version

*LE600h-W*: Wide 75 degree version

### Features

INON LED flashlight "h series" is equipped with quality LED module delivering 90 CRI and 6500K. Higher CRI enables to reproduce natural color of a subject when shooting still image or video using LED flashlight as a primary lighting source and higher CCT (correlated color temperature) attains similar color tone of INON strobe to make it easier to use as a focus light without particular color hue.
